

HAVE YOU HEARD ABOUT NATURE'S "FIRST FOOD"? IT'S COW COLOSTRUM

Cow colostrum is the nutrient-rich milk produced by cows during the first 24-48 hours after giving birth to calf, offering an exceptional blend of proteins, immunoglobulins (antibodies), antioxidants, vitamins, minerals, growth factors, amino acids, and enzymes. Together, these powerful components work harmoniously to strengthen the immune system and promote healthy growth. Often referred to as a superfood, cow colostrum delivers remarkable healing and nutritional benefits for humans. Ancient Ayurveda recognized its significance and aptly named it 'Gau Piyush,' where 'Gau' means Cow and 'Piyush' means "Divine Nectar".

INDIA'S LEADING MANUFACTURER OF HIGH QUALITY COW COLOSTRUM

EXPLORE OUR PREMIUM COW COLOSTRUM FORMS

COW COLOSTRUM POWDER FORM

Pure Cow Colostrum Powder is available in bulk format as a high-quality raw material for manufacturers, suppliers, and businesses in the health and wellness industry. As a leading company in this field, we provide premium colostrum sourced from healthy cows, ensuring the highest standards of purity, potency, and nutritional value. Our cow colostrum is ideal for use in supplements, functional foods, and cosmetics. Whether you're formulating new formulations or expanding your offerings, our bulk colostrum powder is the perfect addition to support your business needs.

LIPOSOMAL COW COLOSTRUM: NATURE'S IMMUNITY, ENHANCED BY SCIENCE

Experience the next level of wellness with Liposomal Cow Colostrum - a breakthrough in advanced health support. This innovative delivery system ensures up to 16 times higher bioavailability, allowing your body to absorb and utilize the potent nutrients with liposomal technology, the purity of cow colostrum is enhanced. It's not just colostrum; it's colostrum redefined for modern wellness. Liposome-Enhanced Colostrum - Maximum Absorption & Potency Liposomes are tiny, spherical vesicles that enhance nutrient delivery. Made from the same phospholipids as cell membranes, they seamlessly merge with cells, ensuring direct absorption while bypassing the digestive system, which can degrade or limit nutrient effectiveness. This advanced delivery system is particularly beneficial for colostrum, preserving its bioactive components and maximizing bioavailability. By encapsulating colostrum in liposomes, we ensure superior absorption, potency, and efficacy—helping you unlock the full benefits of nature's most powerful immune-boosting and growth-supporting nutrients. Experience the future of colostrum supplementation with cutting-edge liposomal technology.

COW COLOSTRUM CAPSULES FORM: WELLNESS IN EVERY DOSE

Harness the power of nature's first gift in a convenient capsule format! Our cow colostrum capsules are perfect for daily use. Easy to take, these capsules provide holistic support for your daily needs.

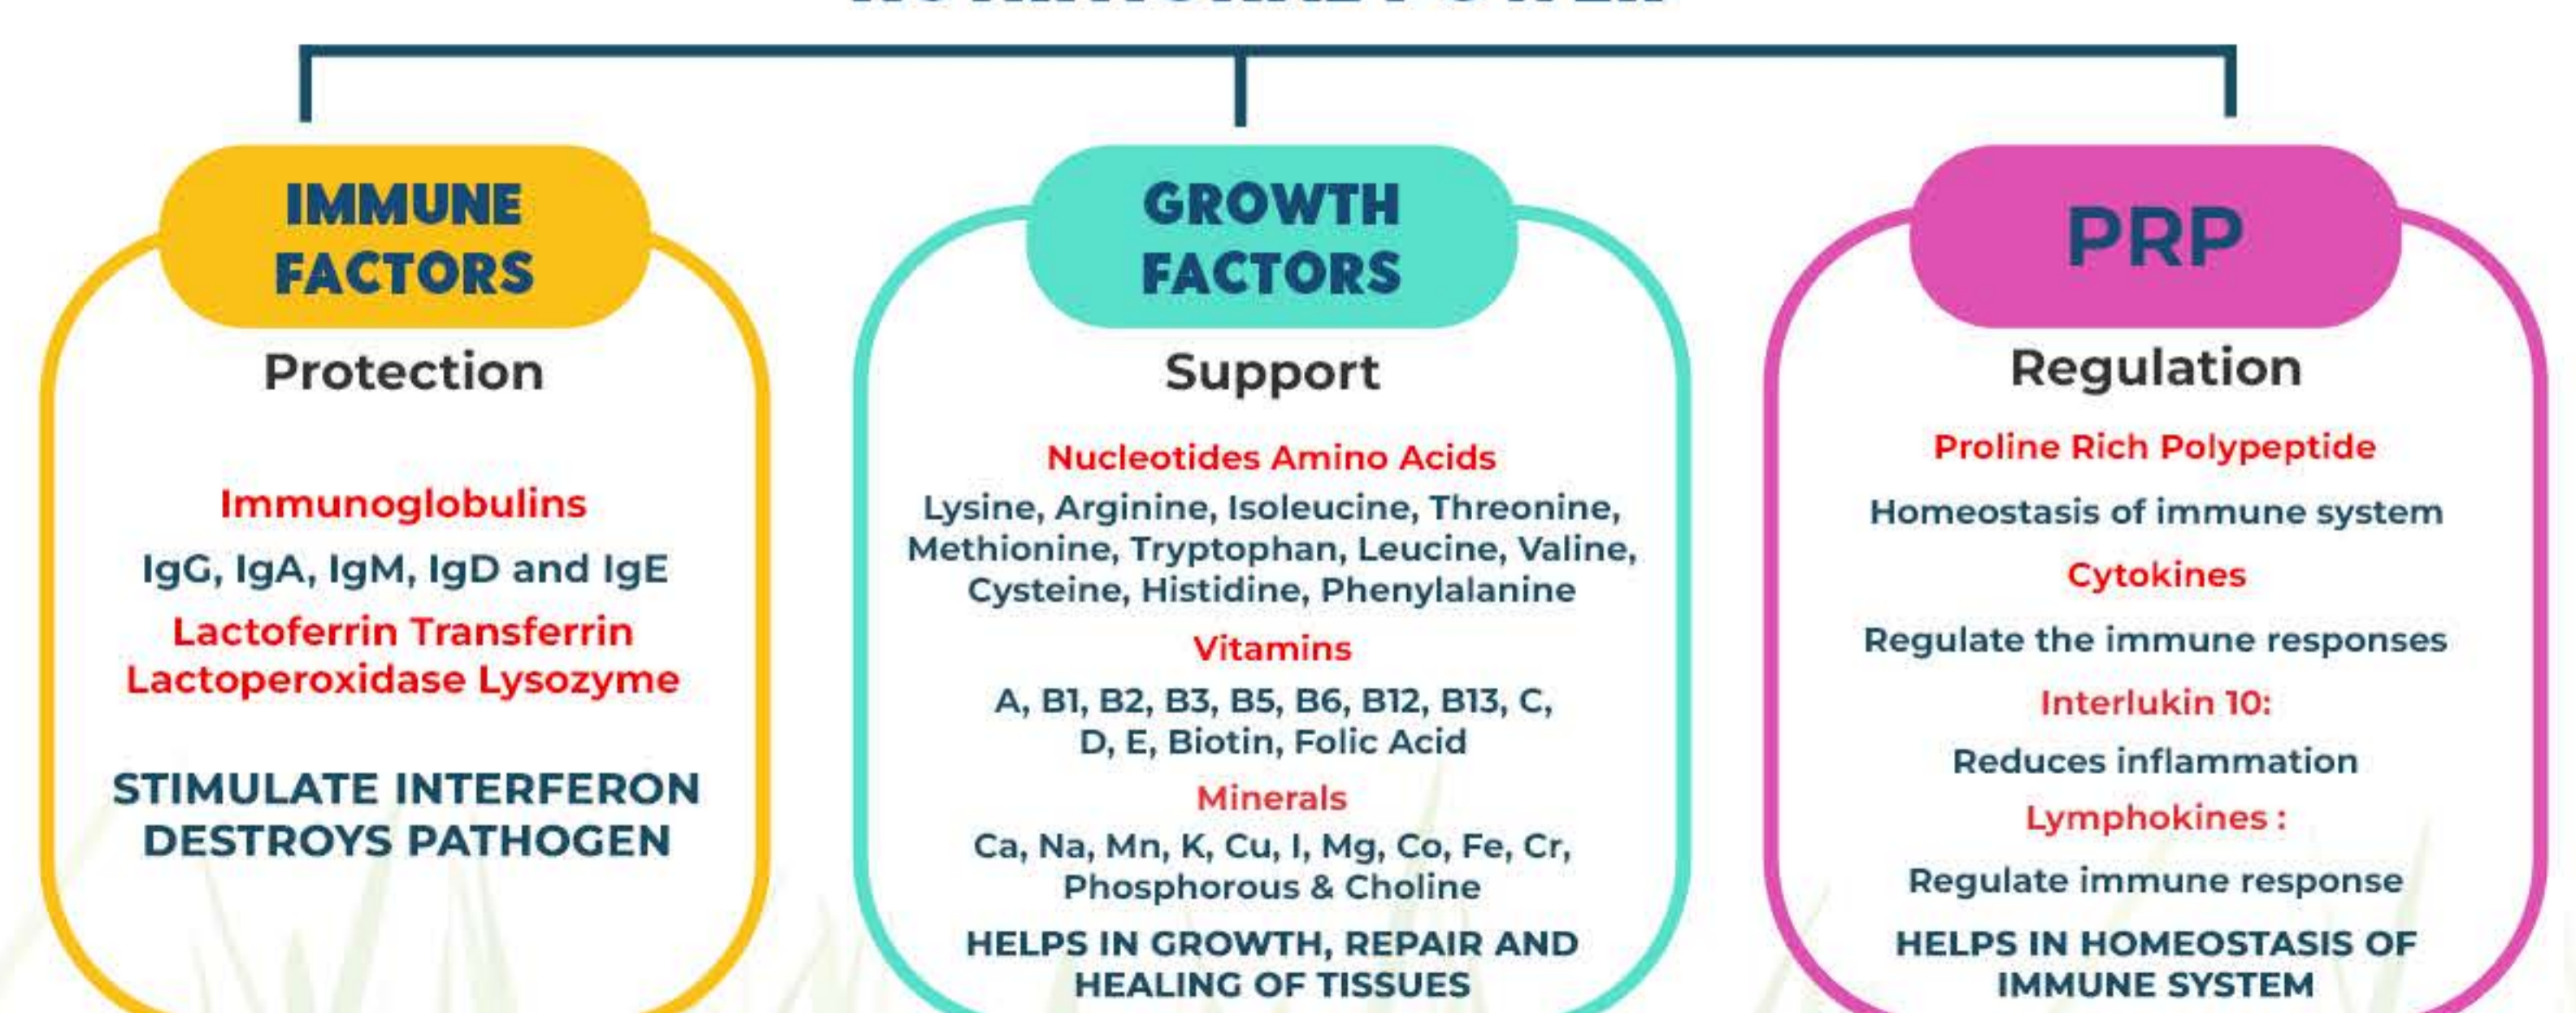

COW COLOSTRUM CHEWABLE TABLETS – NUTRITION ON THE GO

Discover the power of pure cow colostrum in a convenient, tasty chewable form. Perfect for busy lifestyles, they combine health and flavor, making wellness easy, enjoyable, and portable.

COW COLOSTRUM CREAM – NATURE'S SKINCARE SECRET (FIRST TIME IN INDIA)

Experience the power of nature with our Cow Colostrum Cream, a multipurpose skincare marvel enriched with antimicrobial and anti-inflammatory properties. This luxurious cream soothes, heals, and protects, making it your go-to solution for radiant, healthy skin. From calming redness to tackling blemishes, it's the ultimate blend of purity and care. Let your skin glow with the nurturing touch of nature's first gift.

NUTRITIONAL POWER

**PRE-MILKING PREPARATION
HARVESTING THE FIRST DROPS OF LIFE**

The journey begins immediately after the birth of the calf. At this stage, the newborn calf is given priority, receiving all the colostrum it needs for a strong start in life. We take only three milkings that too within 24 hours of calving.

**COLLECTION OF FIRST MILK
RESPECTING NATURE'S PRIORITIES**

The welfare of the cow and her calf remains the cornerstone of the collection process. Once the calf is fully fed and satisfied, the remaining colostrum is carefully harvested by experienced handlers.

THE FINAL RESULT: A TREASURE OF WELLNESS

The collected and processed cow colostrum is a testament to care, innovation, and respect for nature. It retains its original nutritional profile, offering a concentrated source of immunity and vitality in every serving. This elixir of health reaches you in its purest form, ready to support your journey toward a stronger, healthier life. By combining ethical practices with advanced technology, this collection process ensures that the true essence of cow colostrum remains untouched, just as nature intended.

**PROCESSING OF COLOSTRUM
PRESERVING PURITY THROUGH
CUTTING-EDGE TECHNOLOGY**

- LOW HEAT TREATMENT
- SPRAY DRYING TECHNOLOGY
- ADVANCED FILTRATION

**FROM NATURE TO NUTRITION: THE INCREDIBLE
BENEFITS OF COW COLOSTRUM**

**IMMUNE SYSTEM BOOSTING
(IMMUNOLOGICAL DISORDERS)**

Enhances natural killer (NK) cell activity. Provides passive immunity via immunoglobulins. Reduces the risk of cold, flu, and chronic infections caused by weak immunity. Helps fight bacterial, viral, fungal infections (fights infections) Reduces oxidative stress and inflammation from scalp to toe. Boosts respiratory and allergy protection.
